Sydney, Australia

EXPERIENCE

Frontend Engineer at Self-employed Dec 2025 – Present

- Built a **Shopify Hydrogen 2** storefront deployed to **Shopify Oxygen**, layering custom animated modals, sliders, and bespoke UI flows on top of the template.
- Built *Fuzzy*, a local-first task manager for iOS, Android, and web in **React Native** + **Expo** with **WatermelonDB**. Custom dispatcher pattern pairs every domain mutation with an event row for auditable, revertable operations — architected for future sync and agent integrations.

Frontend Engineer at Intermedia 2024 – Dec 2025

- Built and maintained user-facing features and admin panels in **JavaScript**, **HTML**, and **CSS** across a portfolio of client sites.
- Engineered custom reusable Gutenberg blocks with **React**, letting non-technical editors manage front-page content without developer help — reducing tickets and turn-around time.
- Maintained WordPress sites including **PHP** and **SQL** backend updates where needed.

SKILLS

LANGUAGES	JavaScript, TypeScript, Python, C#, Java, SQL
FRAMEWORKS	React, React Native, Next.js, Node.js, Expo, Shopify Hydrogen, WatermelonDB, React Router
TOOLS	Git, Docker, PostgreSQL, MySQL, Linux (Arch, btw), macOS, Windows, MSDOS

EDUCATION

Self-directed study

- Harvard CS50 — Introduction to Computer Science
- freeCodeCamp — JavaScript Algorithms & Data Structures
- Scrimba — Frontend Developer Career Path
- Books — *Computer Systems: A Programmer’s Perspective*, *Designing Data-Intensive Applications*

EARLIER

Senior Night Sorter at Australia Post	2017 – 2020
Assistant Manager at McDonald’s Australia	2011 – 2014
